

Book bindesigns

Creative engraving

BY KEVIN
NOAKES

Hand Tools Catalogue

Hand Tools Catalogue

Hand Tools & Hand Stamps are typically used for the spines and front covers of books. They can create a uniform pattern or by adding more tools to your collection can create more elaborate designs. Our finishing tools are not just limited to Bookbinders as these can be used to make an impression on any leather, clay or glass product. We can also create a makers mark stamp from the designs.

At Bookbindesigns we offer a large selection of over 1,000 Hand Tools & Hand Stamps designs. Our portfolio of finishing tools comes with an ever growing collection of designs to suit most periods of bindings from 16th Century to present day designs.

Our tools are available in various sizes to meet the customer requirements. All of our tools are deeply engraved to give the best impression for a professional finish.

All of our Hand Tools & Hand Stamps come complete with Ash hardwood handles and chrome ferrules. These tools require heat to make the impression onto leather. The tools work well using gold leaf, foil or simply blind embossed. The outside forms are cut closely to the design in order to improve sighting.

If the design you require is not in the catalogue, Bookbindesigns are able to make bespoke Hand Tools/Hand Stamps from artworks, photographs, pdf, AI, old leather prints or any other format you may have.

Please contact us to discuss your design and size requirements.

Creative engraving designed
for bookbinders & leathercrafts
